If Yes, provide a brief description: .

Part I.

Rejection(s) discussed:

NA

Claims discussed:

3

Prior art documents discussed:

NA

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

See Continuation Sheet

Part III.

- It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.
 It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner indicated that the claims would need to be amended to specify a human individual as the claims as written encompassed detection in any subject, including any mammal, which lacked enabled support in the specification under 112/first paragraph. The examiner also indicated that in claim 3, the recitation of "associated with a 2-2-4 haplotype at the Notch4, HSP70-HOM and D6S273 loci" was redundant and should be deleted. The examiner indicated that finality of the previous office action would be withdrawn for the purposes of an Examiner's Amendment. Applicant's representative agreed to the changes in the enclosed Examiner's amendment. .
